## ACADEMIC PROJECTS

- **Game Development-Sepak Takraw (First Person Gaming)** : We have developed a first person game which is based on the real time game called SepakTakraw using UNITY 5.4.This game eliminates some errors in the previous (only)version. This game adopts mostly all the rules and regulations of the game to give the virtual version an authentic feel.
- **Sentimental analysis on Amazon data set reviews** : In this project we tried to analyze the reviews of the customers which was given by the customer on Amazon website and tried to find the rating for the reviews of the customers using lexicon based approach.
- **Android application for attendance management system using fingerprint in mobile** : In this system the attendance taker can select the criteria and can host a Wi-Fi hotspot network through which, the registered students or employees within the region can connect to the network by means of Wi-Fi connection and can give their attendance by scanning their fingerprint through an Android Application. The fingerprint scanned will have an unique key value . If that key value matches with the stored key value in the database then the attendance will be marked.
